**VERSATILITY BY DESIGN**

A modular cockpit design allows you to easily swap between drop bar and pursuit bar (optional).

**OPTIMAL BALANCE**

Stiffness, aerodynamics and lightweight balanced in perfect harmony.

**PERFORMANCE THROUGH INTEGRATION**

The integrated front end was designed to increase aerodynamic efficiency and minimize deflection of the head tube under load, thus giving every advantage to the competitive athlete.

**CUSTOM-DESIGNED ANTI-ROTATION SADDLE RAIL CLAMP**

Ensures the saddle stays put under the highest power output.

**23MM TIRE CLEARANCE**

Designed with Gold in mind. We paired with Denmark, one of the best Pursuit teams in the world, with the goal of shaving a precious few seconds off the clock. This bike endures monstrous power output in the velodrome and yet, handles with absolute precision at break neck speeds.

**COLLABORATIVE DEVELOPMENT WITH DANISH OLYMPIC TEAM**

Designed to meet the needs of the most demanding athletes - Bronze medal in the team pursuit, Bronze medal in the omnium and Olympic record in the individual pursuit at the 2016 Olympic Games.
MODULAR HANDLEBAR

OPTIONAL PURSUIT BAR INTEGRATES SEAMLESSLY INTO THE FRAME FOR MAXIMUM AERODYNAMIC IMPACT

ONE-PIECE DIRECT-MOUNT HANDLEBAR
ULTIMATE POWER TRANSFER FOR STANDING starts

HYPERPRECISE POSITIONING
COCKPIT ADJUSTABLE IN 3 AXES: 320 POSSIBLE CONFIGURATIONS TO FINE-TUNE AN ATHLETE’S PERFECT FIT

ZERO-WAKE HANDLEBAR
INTEGRATED FULLY INTO THE TOP TUBE
DRAMATICALLY REDUCES DRAG

EXTRA LONG EXTENSION BARS
CAN BE TRIMMED TO BE USED AS EITHER STRAIGHT BARS OR 40 DEGREES BENDS

5MM INTERVALS BETWEEN 0 AND +100MM STACK

DIRECTLY ATTACHED TO THE FORK FOR MAXIMUM STIFFNESS

380MM BAR WIDTH

FLIPABLE CLAMPS
